

Module	Requirement ID	Requirement Description	Mapped Test Case ID(s)
Authentication	REQ_AUTH_001	User registration with valid mandatory details (Name, Email, Strong Password).	TC_AUTH_01
Authentication	REQ_AUTH_002	Prevent registration with an already registered email address.	TC_AUTH_02
Authentication	REQ_AUTH_003	Validate mandatory fields are not left blank during registration.	TC_AUTH_03
Authentication	REQ_AUTH_004	Enforce password strength validation (min 8 chars, 1 uppercase, 1 number, 1 special).	TC_AUTH_04
Authentication	REQ_AUTH_005	Ensure 'Password' and 'Confirm Password' fields match exactly.	TC_AUTH_04
Authentication	REQ_AUTH_006	Validate field-level string patterns for invalid email syntax.	TC_AUTH_06
Authentication	REQ_AUTH_007	Authenticate registered users via login form with correct credentials.	TC_AUTH_05
Authentication	REQ_AUTH_008	Deny access and display warning for incorrect password entry.	TC_AUTH_06
Authentication	REQ_AUTH_009	Lock user account automatically after 5 consecutive failed login attempts.	TC_AUTH_07
Authentication	REQ_AUTH_010	Generate secure, time-bound reset link via 'Forgot Password' workflow.	TC_AUTH_08
Authentication	REQ_AUTH_011	Completely terminate active session tokens upon user explicit logout.	TC_AUTH_09
User Management	REQ_USER_001	Allow profile detail modifications (First Name, Profile Picture upload).	TC_USER_01
User Management	REQ_USER_002	Enable authenticated users to change account password from profile settings.	TC_USER_02
User Management	REQ_USER_003	Enforce role-based access restrictions between Administrator, Regular User, and Viewer.	TC_USER_03
Project Management	REQ_PROJ_001	Allow authorized users to successfully create a new project with a unique title and baseline description.	TC_PROJ_01
Project Management	REQ_PROJ_002	Allow users to edit existing project details (such as changing titles) and cascade updates globally across all team workspaces.	TC_PROJ_02
Project Management	REQ_PROJ_003	Allow users to delete a project, prompting a confirmation pop-up and cascading the clearance of all associated tasks.	TC_PROJ_03
Project Management	REQ_PROJ_004	Allow project owners to search and add team members to a project workspace via email, updating the project roster.	TC_PROJ_04
Dashboard	REQ_DASH_001	Display summary workspace counts and metrics accurately on initialization.	TC_DASH_01
Dashboard	REQ_DASH_002	Render dynamic visual tracking charts displaying activity status feeds.	TC_DASH_02
Dashboard	REQ_DASH_003	Overdue tasks counter check.	TC_DASH_03
Task Management	REQ_TASK_001	Allow creating new task cards with Name, Due Date, and Priority levels.	TC_TASK_01
Task Management	REQ_TASK_002	Support Kanban drag-and-drop actions to change columns (To Do, In Progress, Review, Done).	TC_TASK_04
Task Management	REQ_TASK_003	Allow users to delete or archiving old completed items.	None
Task Management	REQ_TASK_004	Support setting a valid task due date that cleanly locks onto the task card and triggers appropriate validation tags.	TC_TASK_05

Task Management	REQ_TASK_005	Enforce validation when a past date is set as a due date, and automatically flag a task card as 'Overdue' if the timeline passes without being closed.	TC_TASK_05
Task Management	REQ_TASK_006	Allow authorized team members to type and post comments on a task card with an accurate user timestamp.	TC_TASK_06
Search & Filters	REQ_SRCH_001	Allow users to search tasks by exact title keywords, dynamically rendering only relevant matches on screen.	TC_SRCH_01
Search & Filters	REQ_SRCH_002	Support task board filtering by priority levels (Low, Medium, High), masking out irrelevant tasks instantly.	TC_SRCH_02
Search & Filters	REQ_SRCH_003	Gracefully handle non-existent search keywords by clearing the board completely and displaying a "No tasks found" message.	TC_SRCH_03
Notifications	REQ_NOTI_001	Trigger a real-time notification alert toast ("Task Assigned") to the assigned user immediately upon task allocation.	TC_NOTI_01
