

Bug Report for Nova -

Bug Report 1: Authentication Module (UX / Keyboard Navigation)

- **Bug ID:** BUG-013
- **Title:** [Login] Pressing the 'Enter' key does not submit the login form after entering credentials
- **Environment:** Google Chrome (Version 153.0) / Windows 11 (*Reproducible across all browsers*)
- **Severity:** Low (*Functional UX / Accessibility Defect*)
- **Steps to Reproduce:**
 - Navigate to the login page (app.novatools.org).
 - Input a valid email address into the Email field.
 - Input a password into the Password field.
 - With the cursor focus still active inside the text field, press the **Enter** key on the physical keyboard.
- **Evidence video location:** Abiduddin Ahmed - QA Assignment NOVA\Test Evidence\Defect, Bug.
- **Expected Result:** The login form should submit automatically, or the page should handle the keyboard event exactly like clicking the UI "Login" button.
- **Actual Result:** The interface does nothing. The login action is ignored until the user manually clicks the "Login" button with the mouse cursor.

Bug Report 2: Security / Account Settings

- **Bug ID:** BUG-02
- **Title:** [Account Settings] Missing "Change Password" functionality within user profile configuration
- **Environment:** All Browsers / Universal
- **Severity:** High (*Security vulnerability*)
- **Steps to Reproduce:**
 - Log into the NOVA platform successfully.
 - Navigate to the Account Settings / Profile section.
 - Search the interface layout for a security tab, password fields, or a "Change Password" button.
- **Evidence proof Video location:** Abiduddin Ahmed - QA Assignment NOVA\Test Evidence\Defect, Bug.
- **Expected Result:** A secure section should exist allowing users to update their current password by entering their old password and verifying a new one.
- **Actual Result:** There is completely no option or user interface element available to change or update an existing account password once logged in.

Bug Report 3: Project Management Module

- **Bug ID:** BUG-012
- **Title:** [Project Creation] System allows creation of duplicate project names without validation constraints
- **Environment:** All Browsers / Universal
- **Severity:** Medium (*Functional Logic Issue*)
- **Steps to Reproduce:**
 - Navigate to the main Dashboard and click "Create New Project".
 - Enter the name "QASprint2026" and click save.
 - Click "Create New Project" a second time.
 - Enter the identical name "QASprint2026" and click save.
- **Evidence video location:** Abiduddin Ahmed - QA Assignment NOVA\Test Evidence\Defect, Bug
- **Expected Result:** The system should reject the duplicate entry with a validation alert: *"A project with this name already exists. Please choose a unique name."*
- **Actual Result:** The system creates two identical project cards on the dashboard with no warning, creating data confusion.

Bug 4: Authentication Module

- **Bug ID:** BUG-010
- **Title:** [Session Expiry] App fails to redirect to the login screen after user session tokens expire
- **Environment:** Google Chrome (Version 124.0) / Redmi Note 13 Pro
- **Severity:** High
- **Steps to Reproduce:**
 - Log into the application and leave the browser tab inactive until the session token naturally expires.
 - Return to the tab and click on the "Create New Task" button without refreshing the page.
- **Expected Result:** The user should immediately be redirected to the /login page with a message saying "Session expired".
- **Actual Result:** The UI allows input attempts but displays generic error boxes like [object Object] on every action.
